### PROFILE

Frontend Engineer with over 4 years of experience building fast, accessible, and visually engaging web applications.

Skilled in React, Next.js, and TypeScript, with a strong focus on creating scalable SaaS products that deliver real business impact and a smooth user experience.

### EMPLOYMENT HISTORY

#### Frontend Engineer, *Fusion Intelligence*

- Built, tested, and shipped new features in **TypeScript** and **Next.js** for a restaurant management SaaS platform, improving scalability and maintainability.
- Redesigned the **onboarding flow**, cutting setup time from **3 weeks to just 2 days** and **boosting user retention by 50%**.
- Maintained and optimized key product features through continuous improvements, bug fixes, and performance tuning to enhance overall stability.
- Developed a **sales reporting module** that gave clients real-time insights into revenue and inventory, helping reduce stock wastage and improve financial decision-making.

#### Frontend Engineer, *Checkref (Contract)*

- Built **CheckRef**, a reference-checking and pre-onboarding platform that automates candidate verification and compliance for hiring teams.
- Led the end-to-end development using **Next.js, TypeScript, React Query, and Tailwind CSS**, focusing on speed, scalability, and clean architecture.
- Created an onboarding flow that **cut manual reference checking time by 85%** and **reduced HR costs by 80%** through automation.
- Improved app load time by **60%** using performance optimizations like lazy loading and code splitting.
- Collaborated with designers and early users to refine the UI, resulting in a **more intuitive experience and higher user engagement**.

#### Full-Stack Developer, *ISeeMemories (Contract)*

- Built and launched a full-stack **custom photo book web app** using **Next.js, Node.js, Express, and Tailwind CSS**, delivering a polished, production-ready MVP.
- Partnered directly with the founder to translate business goals into technical features, ensuring the product aligned with real user needs.
- Developed secure backend APIs to manage image uploads, user accounts, and order workflows, improving reliability and data integrity.
- Helped the platform reach **1,00+ users within the first few months** by delivering a fast, stable, and user-friendly experience that supported paying customers.

#### Frontend Engineer, *The Pake Group*

- Boosted community engagement for the **Church of Jesus** mobile app by building an **admin panel** that enabled scheduling, group management, and daily Bible notifications, improving communication and user activity.
- Built **Pake Purchase**, a complete **e-commerce platform** with product listings, shopping carts, wishlists, and a streamlined checkout flow, resulting in a more intuitive and enjoyable shopping experience for users.
- Simplified daily operations for a **car dealership** by developing an **admin dashboard** for inventory tracking, vehicle listings, and FAQ updates, reducing manual management time and increasing efficiency.

06/2023 – Present

Lagos, Nigeria

10/2024 – 09/2025

United Kingdom

10/2024 – 12/2024

Lagos, Nigeria

09/2023 – 07/2024

Frisco, Texas, United States

**Frontend Development Intern, Hotels.ng**

10/2022 – 12/2022

- Collaborated with a cross-functional team to develop a Reputation Management Software during a two-week sprint, helping business owners manage and remove negative online reviews.
- Designed and implemented the web frontend using React JS, integrated backend data, and ensured smooth display of information, while also writing tests for the application.

**Frontend Development Intern, Genesys Tech Hub**

06/2020 – 09/2020

Enugu, Nigeria

- Learned front-end skills in HTML, CSS, JavaScript, and React JS by working on various projects and delivering high-quality results. I also collaborated with other developers using Git and GitHub.
- Contributed to design thinking and team-based projects, enhancing teamwork skills while collaborating with other interns using JIRA.

**SKILLS**

JavaScript	ES6
TypeScript	React.js
Next.js	Node Js
HTML & CSS	React Query
JIRA	Express Js
Tailwind CSS	Framer Motion
Git and GitHub	Zustand
Cypress	Jest

**EXTRA-CURRICULARS****Horde Budgeting App | Frontend Developer, Personal Project**

06/2024 – Present

- Enabled users to manage their finances effectively by developing a budgeting app for tracking monthly income and expenses.
- Designed an intuitive interface, simplifying expense categorization and providing detailed financial insights and analytics.
- Features for generating financial reports, helping users monitor their financial health, and making informed budgeting decisions.
- Notifications and alerts for upcoming bills, low balances, and budget limits to enhance user engagement and financial awareness.

**EDUCATION****B.Eng. in Computer Engineering, Nnamdi Azikiwe University**

2016 – 2021
